

# COIL and the digital revolution

COIL as an innovative practice

Eva Haug  
Educational Advisor IoC and COIL  
Amsterdam University of Applied Sciences

# Creating real impact

- Designing for collaboration: going beyond “compare & contrast”
- Collaborating with new stakeholders: NGO’s, local business, local government
- Embedding COIL in curriculum: aligning learning outcomes and assessment
- Ripple effect of COIL: research, mobility, quality of teaching

# COIL as a driver for wider institutional engagement with internationalisation

shutterstock.com · 1589801590

Engaging different stakeholders: international office, educational technology, curriculum development, teaching & learning, diversity & inclusion

Professional development for COIL, as a modality to internationalise the curriculum (IaH)

# Balancing act between bottom up & top down

- Without academic buy in, there's no COIL
- Without leadership support, there's no institutionalized COIL
- COIL is not the goal, but a means to an end
- Connecting COIL to institutional vision, ambition and strategy

# Thank you!
